

SecuGate[®] 4000A

Walkthrough Metal Detector

Adopt the most advanced digital detecting technology in the world. SecuGate[®] is special for detecting metal and alloy articles concealed in human body. It is highly safe, widely applicable and highly sensitive with a wide detecting range and a good anti-interference capability. The user can configure the gate according to the size and weight of the article for detection to exclude error alarm for coins, keys, jewelries and belt buckles. It is applicable in the places such as factories, mines, banks and luxuries houses, where expensive metal articles may get lost easily, and places such as airport, custom house, jails, exhibition halls, where dangerous metal articles are prohibited.

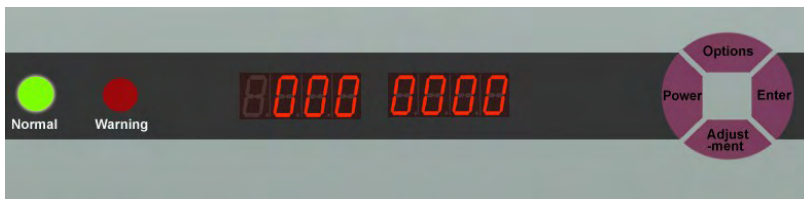

Feature and Benefits:

18 Detection Zones	SecuGate [®] 4000A offers exclusive multiple targets pinpointing with 18 distinct zones for full target coverage on the left, center and right side of the body from head to toe.
Entry Passing Lights	Smooth, efficient traffic flow with easy-to-view, eye-level passing lights on the entrance side of each panel.
Overhead Control Unit	LCD Display, alarm lights, LED bar graphs and control touchpad plus all wiring, connections and electronics are integrated into the overhead compartment.
Audible and Visual Alarms	Audible alarm and Visual LED lights signals when a target has been detected.
High adjustable sensitivity	SecuGate [®] 4000A series walkthrough metal detectors gate is adjustable. In the highest volume, articles as small as a paper clip can be detected and indicated.
Password protection	SecuGate [®] 4000A is designed for use by authorized personnel with multi-level security codes. It only allows authorized users to change settings.
No battery is required for memory retention	Maintains all settings in events of Power failure and not require recalibration each time when turned OFF and back ON. No battery is required for memory retention. While the unit is in operation, a self-test of all systems is performed continuously with any failures or problems immediately reported on the LCD display.
Harmless to human body	Using sensitive metal detecting technology is harmless for heartbeat of human body, magnetic tapes, video recording tapes and software disks and Cds.

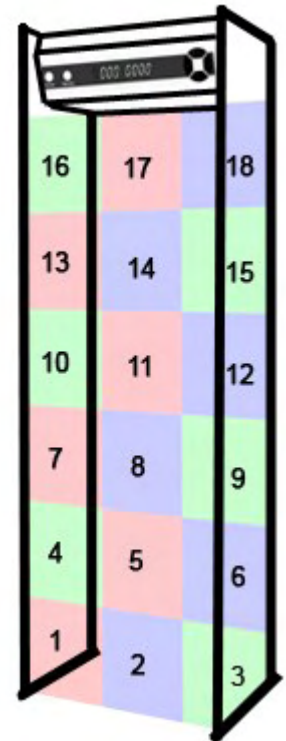

SecuGate[®] 4000A

Traffic Counter	SecuGate [®] 4000A have function to counts the traffic which passed through the walkthrough gate.
Interference	Dual channels and DSP circuitry allow several ST series scanner gates to operate simultaneously in close proximity to one another.
Dimensions	Outer frame: 2.2 X0.79 X0.54M (H X W X Depth) Inner frame: 2.0X0.7X0.540M (H X W X Depth)
Electric current	220V Power: 35VA
Net Weight	±80kg
Working Temperature	-20°C ~ ±45°C
Standard	GB15210-2003 and CE Approved

SecuGate[®] : Easy to view LCD/LED Panel with touchpad keys, Easy setup operation with remote

18 Detection Zones
